lifetime warranty on plasma visual quality

— WHAT IS IT

Controlled lightning in glass

Inside each vessel is a low-pressure blend of noble gases. A high-frequency field ionizes it into plasma — living threads of light, glowing clouds and electric branching that never repeat themselves.

Real plasma, not LEDs

No screens, no diodes, no imitation. A genuine electric discharge dances in noble gas, responds to your hand through the glass, and draws patterns that physics alone decides.

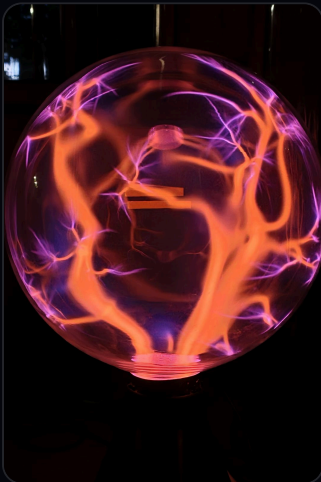

Why they glow differently

Neon, argon, krypton, xenon and their blends each ignite in a different voice — from icy white-blue to emerald, amber and violet. Vessel shape and excitation mode finish the character.

Born by hand

Glassblowing, deep-vacuum processing, gas selection and discharge tuning — every stage is done in-house. No two pieces are ever identical, in form or in fire.

**This is what lightning looks like
in the atmospheres of other planets.**

THE COLLECTION · I

Plasma tubes

Ten signature discharges, four sizes each — from a desktop 90 cm piece to a 2-meter column of living light.

BLUE

The Deepwater Tide

Slow white-blue currents drift in graceful bends through a rich ultramarine ambience. Calm, fluid, immersive.

from **\$850**

TURQUOISE

The Electric Fractal

An ultra-bright turquoise filament racing in razor-sharp fractal paths. Audible, intense, built for public spaces.

from **\$920**

ORANGE

The Orange Flame

A vertical column of synthetic fire — real plasma flowing upward like a silent bonfire. Warm, slow, hypnotic.

from **\$997**

RED

The Crimson Thread

A razor-thin red filament trembling like a living nerve inside the glass. Electricity reduced to a single vibrating line.

from **\$997**

GREEN

The Green Haze

Emerald plasma that coils like green fire or dissolves into glowing arcane mist. You don't switch it on — you awaken it.

from **\$997**

TOXIC GREEN

The Violent Green

Green Haze turned feral: white-hot filaments, murky fog and toxic-green surface brushes in constant fractal chaos.

from **\$997**

Plasma tubes, continued

Interactive characters and multicolor spectra – including plasma that reaches toward your hand.

AMBER

The Neon Roots

Branching amber discharges grow upward like living roots – heavy trunks drifting slowly, fine filaments racing and merging.

from **\$997**

AMBER · VIOLET

The Falling Stars

A soft amber core wrapped in violet tendrils that drift like sparks suspended in time – and reach toward your hand.

from **\$997**

VIOLET

The Ultraviolet Rose

A slow rose-violet glow balancing between red, blue and ultraviolet – with a subtle blacklight effect on fluorescent objects nearby.

from **\$997**

MULTICOLOR

The Prismatic Rift

Three spectra collide in one vessel: a fast turquoise spine, crimson offshoots, violet haze. A living spectrum that never blends.

from **\$997**

Custom mixes and matched series. Intermediate gas blends and discharge characters are possible. Every vessel is unique – but for multi-piece installations we can produce series that look strikingly close to one another.

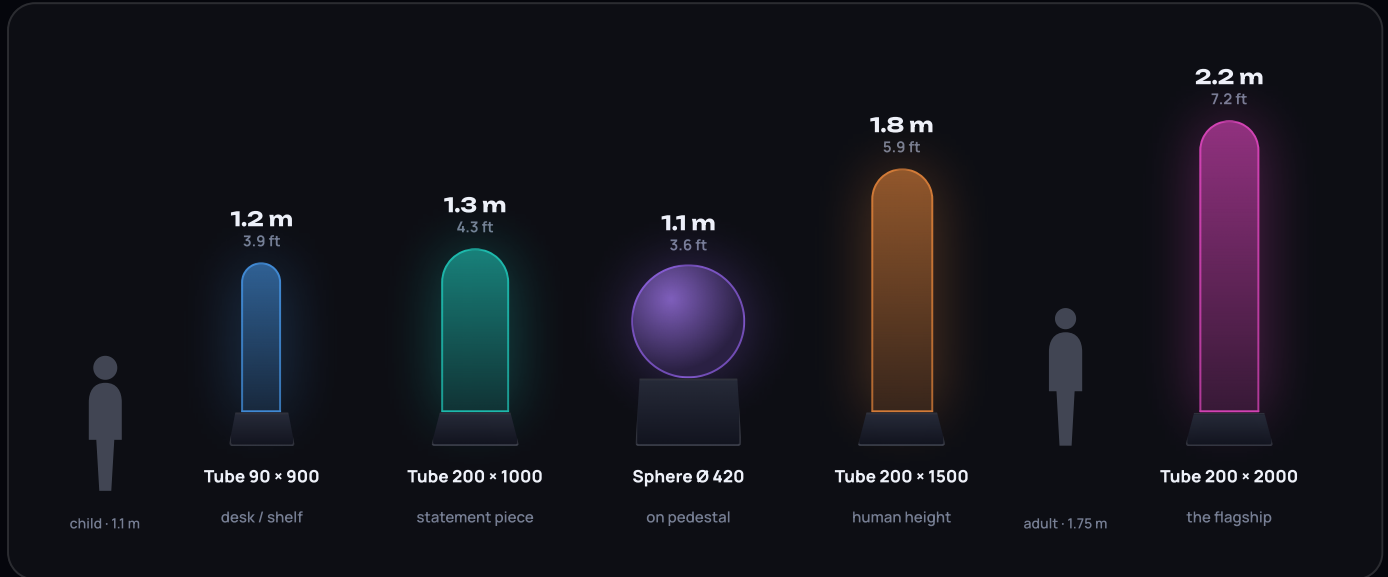

Coming soon: smart controller + Android app. App control of modes and intensity, plus fully customizable music modulation. Ask about early access when you order.

— AVAILABLE SIZES

To scale — with prices

Assembled height includes the base. Vessel size = glass diameter × height, mm.

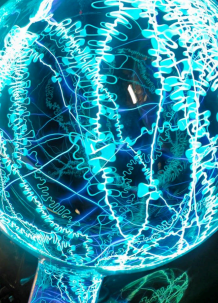

MODEL	90×900	200×1000	160×1500	200×1500	200×2000
● The Deepwater Tide	\$850	\$3,100	\$4,990	\$6,520	on request
● The Electric Fractal	\$920	\$3,100	\$4,990	\$6,820	on request
● The Orange Flame	\$997	\$3,250	\$5,220	\$7,530	on request
● The Crimson Thread	\$997	\$3,250	\$5,220	—	on request
● The Green Haze	\$997	\$3,250	\$5,220	—	on request
● The Violent Green	\$997	\$3,250	\$5,220	—	on request
● The Neon Roots	\$997	\$3,450	—	\$7,450	on request
● The Falling Stars	\$997	\$3,650	—	\$7,250	on request
● The Ultraviolet Rose	\$997	\$3,650	—	\$7,250	on request
● The Prismatic Rift	\$997	\$3,550	—	\$7,250	on request

Prices exclude delivery. The 200 × 2000 flagship is built to order — ask your manager for a quote. "—" = size not offered for this model.

THE COLLECTION · III

Plasma spheres

Museum-grade globes from 42 to 61 cm across – the classic gesture of touching lightning, scaled up to an object you can't walk past.

	<p>WHITE · Ø 42 CM</p> <p>Topaz</p> <p>Continuously flitting, fast, pure white lightning on a pedestal.</p> <p>\$2,130</p>		<p>BLUE · Ø 42 CM</p> <p>Sapphire</p> <p>Deep-blue fractal spirals with an ultramarine aura. Slow, smooth, meditative.</p> <p>\$2,130</p>
	<p>BLUE · RED · Ø 42 CM</p> <p>Amethyst</p> <p>Thin, piercing blue-white strings with a delicate red-purple halo at the tips.</p> <p>\$2,130</p>		<p>TURQUOISE · Ø 42 CM</p> <p>Malachite</p> <p>Quick bursts of blue and turquoise that turn lapis-bright at the touch of a hand.</p> <p>\$2,130</p>
	<p>GREEN · Ø 42 CM</p> <p>Emerald</p> <p>Slow branches of a green plasma tree with fast white tassels at the tips.</p> <p>\$2,350</p>		<p>TRICOLOR · Ø 43 CM</p> <p>Flowering Blossom</p> <p>Turquoise filaments, purple halo and red tassels curving into fractal spirals.</p> <p>\$2,940</p>
	<p>GREEN · Ø 47 CM</p> <p>Chrysolite</p> <p>A saturated green globe with a central electrode – the classic museum icon, scaled up.</p> <p>\$4,860</p>		<p>FLAGSHIP · Ø 61 CM</p> <p>The Gigantic</p> <p>Piercing white-blue filaments with a purple halo. Our largest sphere of storm.</p> <p>\$8,280</p>

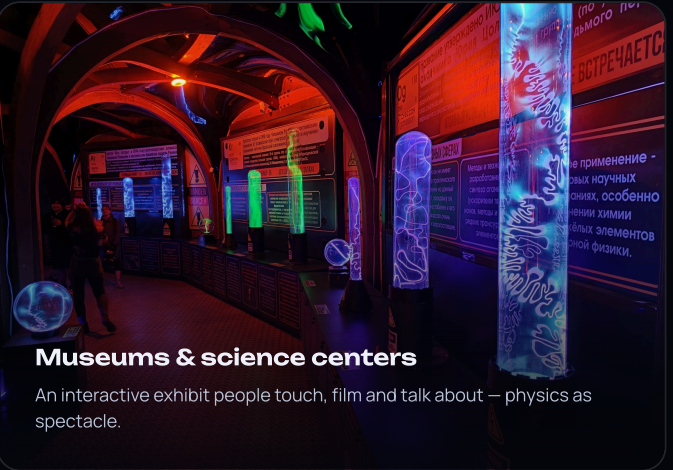

WHERE IT LIVES

Not décor. A focal point.

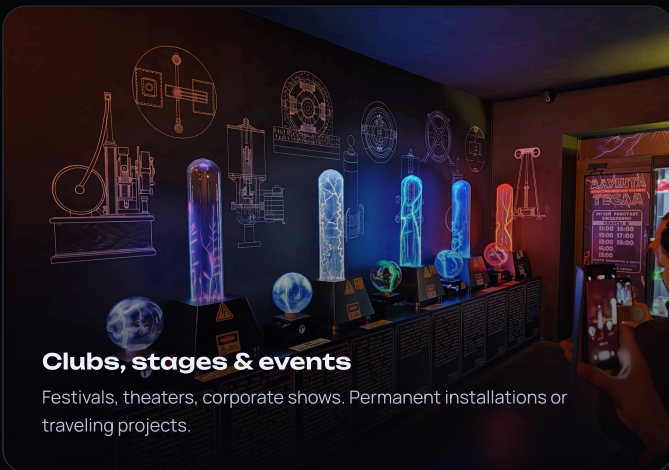

A plasma column is a living alternative to neon signage and a reason for guests to pull out their phones. It works wherever attention is currency.

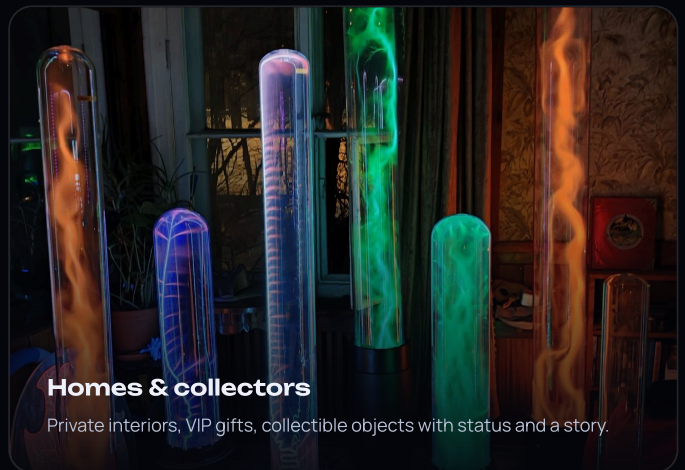

Bars & lounges
Restaurants, hookah lounges, storefronts. Foot traffic stops; the room gets a signature.

Museums & science centers
An interactive exhibit people touch, film and talk about — physics as spectacle.

Clubs, stages & events
Festivals, theaters, corporate shows. Permanent installations or traveling projects.

Homes & collectors
Private interiors, VIP gifts, collectible objects with status and a story.

60-120 W
typical draw, 200 W max — one bright light bulb, from a wall outlet

Sealed for life
no refills ever; lifetime warranty on plasma visual quality

Worldwide
99% of shipments arrive flawless in proven export crating

Touch-safe
thick borosilicate glass; safe for public interaction
